

KleenGrow™

Disinfectant • Bactericide • Fungicide

BROAD-SPECTRUM MICROBICIDE

KleenGrow™ is a 4th generation quaternary ammonium chloride compound with wide spectrum fungicidal and bacterial properties.

KleenGrow™ has high organic and mineral tolerance and works in a pH range of 4-9, yet remains biodegradable.

EFFECTIVE CONTROL

The active ingredients in **KleenGrow™** do not evaporate. This means that **KleenGrow™** will continue to control disease-causing organisms for an extended period of time when re-wetted.

MILDNESS

An unusual attribute of **KleenGrow™** is its low skin-irritating characteristics in addition to its germicidal potency.

ECONOMY

KleenGrow™ is economical and is an effective biocide at a high dilution ratio of 1:1000.

RATE OF PERFORMANCE

Rapid germicidal action by **KleenGrow™** was verified in a study conducted by various testing institutes. Use-solution tests demonstrated that **KleenGrow™** is effective in controlling:

- Botrytis cinerea
- Didymella bryoniae
- Fusarium oxysporum f.sp. radicis-lycopersici
- Clavibacter Michigan esis
- Fusarium solani
- Penicillium oxalicum
- Erwinia

DIRECTIONS

For general surface disinfection use 0.5oz **KleenGrow™** per gallon of water.

Effective over plant material at rates as low as 0.06oz per gallon of water.

- For instructions on the use of **KleenGrow™** in your specific application, contact your **KleenGrow™** distributor or **PACE 49 Inc.** representative.
