

## UpTake PRO MAKES WATER WETTER

When added to tank mixes or irrigation systems the Triple Action Chemistry provides growers a unique water conservation and management tool.

### SPRAY TANK

- Boost the performance of pesticide tank mixes.
- Improve the delivery of companion products.
- Quicker penetration of solution to the root zone.
- A spreader sticker for longer contact of companion product on leaf surface.
- Reduces solution droplet size resulting in better distribution on leaf surface.
- Leaves no visible residue on crop foliage.

### IRRIGATION SYSTEMS

- Improve distribution and penetration of irrigation water.
- For drip irrigation systems, adding UpTake PRO reduces puddling and channeling at the plant's crown.
- As a wetting agent, UpTake PRO helps lower the volume of water needed for adequate watering.
- Allows greater soil absorption with less run-off.

## PACE KLEENGROW FOR DISEASE CONTROL

### ON CROPS

A highly effective EPA Registered Fungicide/ Bactericide for control of plant pathogens.

- Use as a dip solution for cuttings and bulbs prior to planting.
- Safely use on foliage, crown, and roots from propagation to finished crops.
- Use a tank mix with compatible pesticides for broad spectrum control.

### ON SURFACES

Start clean and stay clean to reduce cross-contamination of plant and human pathogens on surfaces before, during, and after the growing season.

- *No-rinse* disinfectant for use in ornamental, hydroponic/ field produce, CEA and outdoor growing/packing/shipping areas, tools and equipment.
- **0 hour REI**, EPA registered, biodegradable, and up to 30 days residual.

### IN IRRIGATION WATER

A safe and economical solution to control algae and water borne plant pathogens in irrigation systems, thus eliminating cross-contamination to plants and surfaces.

- Use in water holding tanks as well as irrigation lines.
- **0 hour REI** when continuously or intermittently injected into irrigation system to control water borne plant pathogens and algae.

## PACE ACBD CLEANERS FOR REMOVING ALL TYPES OF DIRT

The **Pace ACBD System**® (Always Clean Before Disinfecting) is a research proven protocol that will provide optimum results to your cleaning program.

### PACE STRIP-IT PRO™

For greenhouses, irrigation systems and outdoor areas to dissolves minerals and biofilm build-up.

### PACE AgH PRO™

Dislodges sticky sap, baked on grease, and commons soils found in Indoor/ outdoor growing, harvesting/packaging, breakroom areas, as well as warehouses and on heavy equipment.

### PACE MHW™

Low foaming for soaking growing containers prior to washing in an Automatic growing/harvesting equipment.

Complete the cleaning system by applying our no-rinse disinfectant, **PACE KLEENGROW**, for powerful, long-lasting microbial control.

# PACE KLEENGROW/UPTAKE PRO COMPATIBILITY CHART FOR TANK MIXING OR CHEMIGATION

Use the jar test to check for physical compatibility and a test spray on crops to check crop safety.

COMPATIBLE FUNGICIDE/BACTERICIDES		COMPATIBLE INSECTICIDE/MITICIDE/PGR	
Product	Active Ingredient	Product	Active Ingredient
AgriMycin	Streptomycin sulfate	Aria	Flonicamid
Adorn	Fluopicolide	Altus	Flupyradifurone
Aliette	Fosetyl-Al	Avid/Agri-mek	Abemectin
Alude	Phosphorous acid	Chlorpyrifos Pro 4	Chlorpyrifos
Astun	Isofetamid	Conserve®	Spinosad
Banner MAXX	Propiconazole	Decathlon 20 WP	Cyfluthrin
Broadform	Fluopyram + Trifloxystrobin	Discus	Cyfluthrin+Imidacloprid
Chipco	Iprodione	Endeavor	Pymetrozine
Camelot O	Copper octanoate	Entrust	Spinosad
Cease	Bacillus amyloliquifaciens	Flagship 25 WP	Thiamethoxam
Decree	Fenhexamid	Judo	Spiromesifen
Eagle® 20 EW	Myclobutanil	Mainspring	Cyantranilprole
Emblem	Fludioxonil	Mavrick Aquaflo	Fluvalinate
Empress	Pyraclostrobin	Neemix	Botanical Insecticide
Fame	Fluoxastrobin	Pylon	Chlorfenapyr
FenStop	Fenamidone	Pyreth-It	Pyrethrins
Heritage	Azoxystrobin	Safari	Dinotefuran
Kalmor	Copper Hydroxide	Sultan	Cyflumetofen
Kocide 3000	Copper Hydroxide	Talstar NF	Bifenthrin
Medallion	Phenylpyrrole Fludioxonil	Dazide (PGR)	Daminozide
MilStop	Potassium bicarbonate	<b>ROTATE WITH BIOPESTICIDES OR PRODUCTS FORMULATED WITH A SURFACTANT</b>	
Orkestra Intrinsic	Fluxapyroxad + Pyraclostrobin		
Pageant Intrinsic	Boscalid + Pyraclostrobin	<b>Product</b>	<b>Product</b>
Palladium	Cyprodinil + Fludioxonil	Banrot 12 GH	Thiophanate methyl+Etridiazole
Phyton 27	Copper sulfate pentahydrate	Cease	Bacillus amyloliquifaciens
*Plantshield	Trichoderma harzianum	Daconil Formulations	Chlorothalonil
Postiva	Pydiflumetofen+Difenoconazole	Dursban	Chlorpyrifos
*Rootshield	Trichoderma harzianum	Plantshield	Trichoderma harzianum
Segovis	Oxathiapiprolin	Spectro 90	Thiophanate-methyl +Chlorothalonil
Segway O	Cyazofamid	Regalia	Reynoutria sachalinesis extract
**Stature SG	Dimethomorph	Rootshield	Trichoderma harzianum
Subdue MAXX	Mefenoxam	Zyban	Thiophanate methyl+Mancozeb
Terraguard	Triflumizole	3336	Thiophanate methyl
*Rootshield/PlantShield - May be used as a tank mix or chemigation with PACE KLEENGROW or UpTake PRO at rates 0.06 oz/gal (40 ppm) or lower.		26/36 12 GH	Iprodione + Tmethyl
		*Rotate with PACE KLEENGROW or UpTake PRO if rates are higher than 0.06 oz/gal. (40ppm).
