

Cleaning

Pace Cleaning Products

Strip-It PRO™ Liquid Concentrate *for Greenhouses and Irrigation Lines*

- + Acid cleaner, dissolves mineral and biofilm build-up, reducing the risk of clogging emitters.
- + Start with prewetted area for best results.

HORTI-KLOR® Liquid Concentrate *for Packing Houses and CEA Growing Areas*

- + Multi-Purpose, Alkaline cleaner to dissolve protein-based substances such as produce juices.
- + Removes soil, light calcium build-up, and algae stains.

Clean-Up™ Liquid Concentrate *for Warehouses and Heavy Equipment*

- + Alkaline cleaner for heat set, heavily soiled areas.
- + Breaks down greasy deposits even when combined with dust, dirt, and sap.

MASTER MHW™ Flowable Powder *for Automatic Tray, Pot, and Crate Washers*

- + Pre-soak cleaner to soften hard to remove fertilizer and soil deposits from plastic and Styrofoam, growing trays & pots.
- + Low foaming making it ideal for rinsing in automatic washers.

Safe For Use On: wood, pvc pipes, corrugated plastic, stainless steel, aluminum, iron, concrete, poly, and glass.

Clean, Rinse, Disinfect

Pace cleaning products are specialty formulated for the agriculture and horticulture industry.

The Pace ACBD System® (*Always Clean Before Disinfecting*) is a research proven protocol that will provide optimum results to your cleaning program. The cleaning step helps lift debris from the surface for easy removal of build-up, thus eliminating the environment for over-wintering pests such as: snails, nematodes, fungus gnats, insects, and algae.

Step 1 - Soak the prewetted surface with Pace cleaning soap.

Step 2 - Rinse with water to remove the soap and debris from surfaces.

Step 3 - To complete the system, apply no-rinse disinfectant, KleenGrow, for powerful microbial control. (For more information, please refer to KleenGrow Disease, Virus & Algae Control on Surfaces Sheet.

Key Features	Strip-It PRO	HORTI-KLOR	Clean-Up	MASTER MHW
Removes biofilm slime and algae stains	X	X	X	X
Dissolves fertilizer and water mineral deposits in irrigation lines and on cool pads	X			
Breaks down produce juices, resins/sap for easy removal		X	X	
Degreaser, easily washes away baked on dirt			X	
High foaming when using a foam applicator	X	X	X	
Low foaming even during aggitation				X
Applications				
Apply as a heavy soak using a low pressure hydraulic sprayer or back pack	X	X	X	
Apply with a foam applicator to soak hard to clean vertical areas and tight spaces, large equipment, carts, and trailers	X	X	X	
Make soak tank solution for cool pad cells and trays/pots	X			X
Place in automatic washer to rinse off debris and soaking solution				X
All uses MUST BE thoroughly rinsed	X	X	X	X
Areas of Use				
Outdoor or greenhouse growing areas	X			
Field and greehouse irrigation systems	X			
Cool pads, benches, shade cloth, ground cover cloth dirt, or gravel floors	X	X		
Produce packing facilities		X		
Indoor growing areas		X		
Hand tools		X		
Hemp/cannabis processing areas			X	
Pet & poultry housing			X	
Offices, break rooms, and other public common areas		X		
Heavy machinery/equipment & trucks			X	
Clean trays, pots, and carts	X	X	X	X
Automatic washer				X
General Use Rates - See Pace SOP for complete directions				
Surface Cleaning: Gently mix 5-8 fl oz per gallon of water. Soak for 10-30 minutes then thoroughly pressure rinse.	X	X	X	
Irrigation Cleaning: Set volumetric pump at 50 (2.5 fl oz /1 gal) and inject into irrigation lines. Soak overnight then thoroughly flush to rinse.	X	X		
Soak Tank Cleaning: In soak tank mix 3 fl oz liquid concentrated soaps or 1/4 cup of flowable powder per gallon of water. Soak overnight, then thoroughly rinse.	X	X		X
