

Bacteria, Fungi, Algae & Virus Control on Surfaces

Applications

- + Irrigation systems including lines, emitters and recirculated above/below ground water storage tank.
- + Use KleenGrow to disinfect and deodorize indoor and outdoor areas such as farms, greenhouses, packing facilities, and public places such as offices, breakrooms, and bathrooms.
- + After cleaning, apply KleenGrow to disinfect tools, footbaths, coolpads, pots/trays, conveyors, and transportation trucks.

Safe for use on: wood, pvc pipes, corrugated plastic, stainless steel, cooling pads, aluminum, iron, concrete, poly, and glass.

Key Benefits

- + EPA registered, no-rinse disinfectant provides broad spectrum control of algae*, bacteria, fungus, and viruses commonly found on surfaces.
- + Long-lasting residual: the active ingredients in KleenGrow do not evaporate and continue to control disease-causing organisms for up to 30 days even on re-wetted surfaces.
- + Non-corrosive to equipment & structures, and biodegradable.
- + Cleaning and disinfecting prevents cross-contamination of pathogens and algae.

*KleenGrow is not approved for algae control in California

Disinfecting Surfaces

It is imperative to maintain disinfected surfaces before, during, and after the growing season. Start clean and stay clean to reduce cross contamination from a surface crop. *This process will also keep workers safe and protected from outbreaks of harmful human pathogens including viruses, such as human Coronavirus.*

Fully implementing our cornerstone 0 hr REI 3-Step Pace ACBD System® (*Always Clean Before Disinfecting*) positions customers to achieve the highest standard of disinfection. Combine the cleaning program with Disease, Virus & Algae Control on Surfaces for a complete system. Simply partner KleenGrow with a product from the Pace cleaning program specific to your cleaning needs, for superior microbial control.

PACE

ACBD SYSTEM®

Always Clean Before Disinfecting

STEP 1

Clean with Pace Cleaners

Strip-It PRO, HORTI-KLOR

Apply Pace cleaning product to pre-wetted area and allow to soak for 10-30 minutes.

STEP 2

Rinse with Clean Water

Use a pressure rinse to remove soap & debris

STEP 3

Disinfect with KleenGrow

No Rinse Disinfectant

- + Kill algae & plant pathogens
- + Eliminate human pathogens such as Coronavirus
- + Enjoy residual control for up to 30 days
